CAREER OBJECTIVE

Front-end specialist with a solid grasp of back-end technologies. I'm looking for a job where I can use my skills in making things look good and work well on the front end and also handle the technical stuff on the back end. I want to create websites that are easy to use by combining the front and back end smoothly.

SKILLS

- **Front-end Skills** : Javascript, React, Tailwind, CSS, HTML, Firebase
- **Back-end Skills** : Node Js, Express Js, JWT
- **Database** : MongoDB
- **Tools** : Git , VsCode, Netlify, Vercel

PROJECTS

1.MediCamp Hub - Medical Camp Management System

overview : MediCamp Hub is a simple and user-friendly MERN web application designed to improve the effectiveness of arranging and overseeing medical camps, where users can seamlessly participate in these camps

key features :
- In home page user can show top popular medical camps
- Users can pay for camp registration using Stripe.
- A logged-in user can update their own profile picture.

2. Meet Wave - Online Meeting Platform (Team Project)

overview : Our team collaborated to create a meeting website where users can connect with others through audio and video calls. Our focus on simplicity and accessibility is reflected in a user-friendly interface and reliable features. Through close teamwork, we ensured successful feature implementation and a smooth user experience, demonstrating our commitment to innovation.

key features :
- Users can join video and audio meetings, chat in real-time, and share screens.
- Admin users can disable or enable other users, where disabled users are unable to log in to our website.
- Automatically generate unique links for each meeting.
